- 1.1.1 Add a new shop category
- 1.1.2 Add a new good
- 1.1.3 Good collections
- 1..1.4 Search good

>>1.1.1 Official shop – add a new shop category

Before adding a new good to official shop, there should exist at least one shop category. So, let’s start with adding a new shop category.

After adding a new shop category, your official shop form will be like this.

Shop categories without any good will show no icon, but after you adding goods to a shop category, this shop category will choose its first good’s textures icon as icon.

You can also edit shop categories later as your wish

>>1.1.2 Official shop – add a new good

Until now, I believe you have successfully added a shop category. Now, let's add a new good!

After you clicking the 'Add a new good' button, UShop will auto get all item stacks of your inventory, just choose one you'd like to add (here we choose Diamond Sword for an example)

Absolutely, UShop will get all the attributes of this good to add.

- Good name (this will be auto translated according to players' clients)
- Good type
- Good enchants (this will be auto translated according to players' clients)
- Good lore (UShop provide a way to add lore for item stacks)

You just need to further complete the following steps

- Select a shop category
- Select a good mode
 - purchase and reclaim
 - only purchase
 - only reclaim
- Input the purchase price
- Input the reclaim price

Congratulations, you have successfully added a brand new good, let's learn more about this good

- 1.1.2.1 Edit this good (Operators)
- 1.1.2.2 Purchase/Reclaim (these buttons will show according to the good mode)
- 1.1.2.3 Collect/De-collect

>>>1.1.2.1 Official shop – single good: edit this good

The same as edit shop category, you can delete or update single good

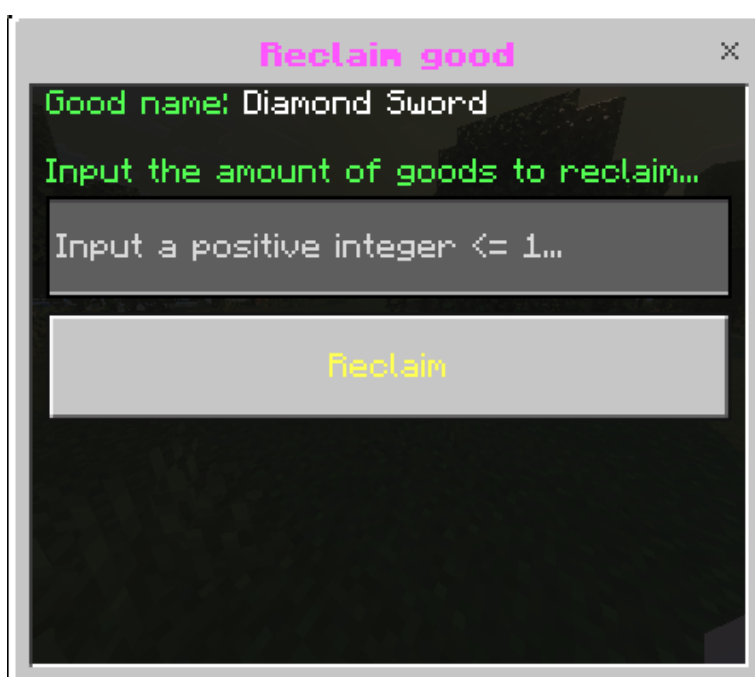

>>>1.1.2.2 Official shop – single good: purchase/reclaim

Whether players are purchasing or reclaiming goods, UShop will accurately detect the status of players' inventory, even changes in players' inventory during the purchase or reclaiming process, and there will never be any situation of item disappearing.

A screenshot of a 'Purchase good' dialog box. The title bar is grey with the text 'Purchase good' in pink and a close button 'x' on the right. The main area has a black background with green text. It displays 'Good name: Diamond Sword' and 'Input the amount of goods to purchase...'. Below this is a grey input field containing the text 'Input a positive integer <= 32...'. At the bottom is a grey button with the text 'Purchase' in yellow.

A screenshot of a 'Reclaim good' dialog box. The title bar is grey with the text 'Reclaim good' in pink and a close button 'x' on the right. The main area has a black background with green text. It displays 'Good name: Diamond Sword' and 'Input the amount of goods to reclaim...'. Below this is a grey input field containing the text 'Input a positive integer <= 1...'. At the bottom is a grey button with the text 'Reclaim' in yellow.

>>>1.1.2.3 Official shop – single good: collect/de-collect

If your official shop has a large number of goods, this will be a very helpful function. It allows players to collect goods they frequently visit, so that they can quickly find them next time. Of course, they can also de-collect goods at any time.

Ushop

>>1.1.3 Official shop – good collections

All goods collected by a player will be displayed here.

>>1.1.4 Official shop – search good

It's also a helpful function, player can quickly find goods by inputting a keyword.

>1.2 Reload configurations

Very easy to use...

Ushop

>1.3 Others

- UShop prevent non-OP players from holding spawn eggs to interact with Monster spawner/Trial spawner, so you can choose spawn eggs as goods.
- Ushop can't get correct names and textures icon of items form Add-on

Ushop

>1.4 DLCs
